

Composition and Ordering

1

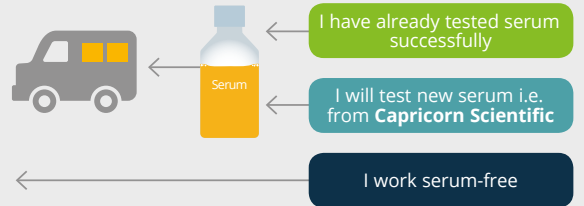

We discuss the formulation of your customised Ready to Use medium with you. All you have to do is place your order.

We plan and take care of all preparations for the manufacturing process.

Serum Procurement

We pick up your serum either directly from you or from your supplier. If you do not yet have serum in reservation, we will assist you with identifying and testing the best serum product for your cell culture.

2

Production and Sterile Filling

3

We produce your customised medium under strict quality control and sterile conditions. Your PARA|DYM™ Ready to Use medium is aseptically filled into flasks in our industrial clean rooms (Class xx). Each flask is individually labelled according to your specifications.

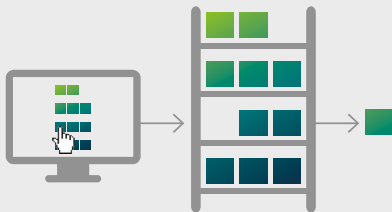

Innovative Packing

Each flask is vacuum-sealed in plastic. The flasks are thereby protected from all forms of contaminants and dust.

4

Storage and Call Off

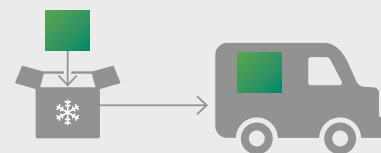

5

Your PARA|DYM™ Ready to Use medium will be stored under strictly controlled temperature conditions in our cold rooms. You can check your inventory online and at any time call off whatever quantities you need delivered to your laboratories. Or you can set up a standing order.

Delivery

Your PARA|DYM™ Ready to Use medium will be sent to you within 24 hours of your call off in special environmentally friendly insulated cases. You choose whether you want your medium to arrive frozen or thawed and immediately ready to use.

6

Your PARA|DYM™

Ready to Use and sterile.
